PROFESSIONAL SUMMARY

Front-End Developer and Power Pages Specialist with 2+ years of professional experience crafting modern, pixel-perfect, and responsive enterprise portal solutions. Specialised in custom UI/UX design for Microsoft Power Pages, Dataverse administration (tables, columns, permissions and Web Roles), JavaScript Portal WebAPI integrations, Microsoft Entra ID authentication, and secure Azure-backed document handling. Proven track record of transforming manual business workflows into streamlined, self-service digital platforms.

TECHNICAL SKILLS

- **Power Pages & Low-Code:** Power Pages, Dataverse Architecture (Tables, Columns, Web Roles, Table Permissions), Microsoft Entra ID Authentication, Portal WebAPI (JavaScript), Solution Import/Export (ALM), Basic Power Automate.
- **Azure & Integration:** Azure Function Apps, Azure Blob Storage, Event Grid, API Management, Key Vault, Microsoft Defender for Storage (malware scanning).
- **Front-End Development:** HTML5, CSS3, JavaScript (ES6+), Bootstrap, Tailwind CSS, Responsive & Mobile-First UI/UX, Cross-Browser Compatibility.
- **CMS & Frameworks:** WordPress (Custom Themes & Layouts), Contentstack CMS, React.js (Foundational).
- **Developer Tools:** VS Code, Git, GitHub Pages, Chrome DevTools.

PROFESSIONAL EXPERIENCE

GuruGroup — Associate Engineer

April 2024 – Present | Islamabad, Pakistan (Hybrid)

- Designed and deployed responsive front-end interfaces for enterprise Power Pages portals, improving end-user usability and accessibility.
- Delivered a secure document upload and download capability for a Power Pages portal using Azure Function Apps, Blob Storage, Event Grid and API Management, with every file malware-scanned before release to users.
- Solved data security and privacy challenges by configuring fine-grained Dataverse Table Permissions and Web Roles across multi-user environments.
- Implemented client-side JavaScript calls using the Power Pages Portal WebAPI for dynamic, real-time Dataverse record creation and retrieval without page reloads.
- Handled Microsoft Entra ID (Azure AD) identity provider configuration and automated user profile mapping for secure external portal access.
- Built mobile-first marketing and web interfaces using HTML5, CSS3, Bootstrap and Tailwind CSS across various corporate client projects.
- Collaborated closely with backend engineers and UI/UX designers to translate requirements into pixel-perfect web applications.

FEATURED PROJECTS

Vendor Portal — Enterprise Power Pages Solution

- **Overview:** Engineered a custom Power Pages portal from the ground up to replace slow, manual vendor tracking processes with a secure digital self-service platform, including a secure document upload and download capability.
- **Key Contributions:**
 - Replaced manual paper and spreadsheet workflows with intuitive, custom-styled web forms and a responsive UI layout.
 - Configured Microsoft Entra ID for identity verification and secure vendor portal logins.
 - Solved row-level security needs using Dataverse table permissions and Web Roles.
 - Integrated JavaScript Portal WebAPI for seamless, real-time backend data submission.
 - Built a secure document upload and download feature: an Azure Function App wrote incoming files to an isolated quarantine Blob Storage container, Microsoft Defender for Storage scanned each file, and Event Grid triggered the move to an approved container only on a clean result.
 - Stored file references in Dataverse and enforced row-level access so each vendor can view and download only their own documents, with endpoints exposed through Azure API Management and secrets held in Azure Key Vault.
- **Tech Stack:** Microsoft Power Pages, Dataverse, Entra ID, JavaScript (WebAPI), HTML5, Bootstrap, Azure Function Apps, Azure Blob Storage, Event Grid, API Management, Key Vault, Microsoft Defender for Storage.

Trillora (Packaging Company) — Power Pages Solution

- **Overview:** Delivered a high-performance Power Pages solution to digitise client reporting and data visualisation.
- **Key Contributions:**
 - Designed custom responsive page layouts tailored for clear enterprise data visualisation.
 - Customised out-of-the-box Power Pages components with clean CSS and custom JavaScript.
- **Tech Stack:** Power Pages, Dataverse, JavaScript, HTML5, CSS3, Bootstrap.

Enterprise HR & Payroll System (Ultimate Works)

- Developed multi-role UI dashboard interfaces for enterprise HR and payroll operations.
- **Tech Stack:** React.js, Bootstrap, Custom CSS.

Additional Web & Corporate Solutions

- **WordPress & CMS:** WindowNation (USA), CecilHub (Australia), Crystal Consulting Group (UAE), Contentstack page implementations.
- **Websites & Landing Pages:** gurug.com, guru.au, khizaans.com, qwik.pk, crystalguru.com, shipguru.net.

EDUCATION

Federal Urdu University, Islamabad, Pakistan

BS in Computer Science (Major in Software Systems) — Graduated 2011

- Final Year Project: Medical Information Exchange (MIE) in .NET Framework using ASP.NET and C#.NET.
